| • C++ | • C# | • Verse |
| • Unreal Engine 4/5 | • Unity | • UEFN |
| • 3D Math | • Jira | • Confluence |
| • GitHub | • Perforce | • Flecs (ECS) experience |

EXPERIENCE

Gameplay Programmer

April 2026 - Present

Cow Town Games - Remote

- Prioritize player and gameplay features and implementations in **Unreal Engine**.
- **Collaborate** with designers and animators on implementing **AI NPCs** in both **C++** and **Blueprints**.
- **Prototype** upcoming or experimental features for future expansions in Blueprints.

Gameplay Programmer

May 2025 - March 2026

Epic Games - Remote

- **Shipped 2 UEFN** templates used by players and creators to learn and understand **Verse** Code.
- **Designed** and **implemented** gameplay systems, including UI, dialogue, and quest systems using **Verse**.
- **Collaborated** with designers and engineers to refine gameplay features and logic.
- **Prototyped** gameplay mechanics in UEFN within internal projects.
- **Experimented** and **internally tested** upcoming **UE** & UEFN features, identifying bugs, edge cases, and integration issues.

Gameplay Programmer Intern

January 2025 - May 2025

Epic Games - Remote

- **Collaborated** with a **globally diverse team**, contributing to internal programs in **UEFN** using **Verse**.
- **Playtested** and **evaluated** developing gameplay experiences, identifying bugs and improving stability.
- **Evaluated pre-existing** features and documented improvements and issues.

PROJECTS

AI Programmer

January 2024 - May 2024

Le Peste Noire (Unreal Engine)

- **Led** combat development with complex **AI** behaviors and mechanics using **C++** and **Blueprints**.
- **Designed** Finite State Machines to operate **behaviors** for combat, patrol, and alerts.
- **Utilized** Unreal's **AI Perception System** for enemy detection and tracking.

EDUCATION

Bachelor of Science in Game Development (B.S.)

May 2024

Full Sail University, Winter Park, FL

SKILLS
